**Subject:** RE: upcomming actions

I would expect they would set up first thing in the morning, and be out there a good part of the day Mike.

Will confirm with the Nalco guys.

**Subject:** RE: upcoming actions

Tom-

I wanted to follow up on your first steps at 001. Last week we indicated that you would likely be completing that this week, and wanted to see if you had any updated plans.

**Subject:** RE: upcoming actions

Mike, as we sample, and do work any diving work at Outfall 001, we will give you advance notice. Our first step is to get a diver in the water at the 001 Outfall to assess the situation, and I will let you know what day we will do that (likely later next week). Will let you know ahead of time when we are sampling also.

I have National resetting the sock booms at 001 today to close the gaps.

**Subject:** upcoming actions

Tom-

I wanted to follow up with you regarding some of the upcoming work you described to me yesterday, including the diver to the area around outfall 001. The EPA would be interested in observing some of that work. If you are okay with the EPA observing it, would you kindly share the details as to when it will be occurring?

Thank you,  
mike
